

# Laser Spa Group's Training Registration

**Laser Spa Group** certificate courses are offered in Laser Hair Removal, BBL/IPL (Broad Band Light/Intense Pulsed Light) for Skin Rejuvenation, Cellulite & Body Contouring, Tattoo Removal, Thermocoagulation with Thermo-Lo, Chemical Peels, SilkPeel Dermalinfusion, Microdermabrasion and more. They have been designed for those students with the appropriate pre-requisites, including aestheticians, electrologists, other laser system operators, nurses, cosmetologists, medical personnel/assistants and physicians. Laser Spa Group is operated under the supervision of Bozana Skojo, who has been specializing in laser hair removal procedures for 16 years, and an experienced aesthetician for almost 20 years. We have several experienced and qualified educators to train you in your chosen course.

## **Why Participate in this Course?**

This industry we participate in is highly skilled and professional, however we believe to ensure good and safe client care for cosmetic light treatments (i.e. hair removal and skin rejuvenation) we need to have in place minimum professional standards of practice. The Laser Training Course gives a solid grounding in the understanding of laser light and intense pulse light, how it works, an overview of skin and hair anatomy and physiology, best practice, thorough documentation, safety, recognizing potential hazards, contraindications, and an overview of the different technologies available. You will be offered ongoing education and support from our company. If our student chooses to reach our certification standard, then this course is the first step in achieving this. Our aim is to ensure that all laser and intense pulse light operators practice professionally, safely and with expert knowledge. Our point of difference is almost 20 years experience in the cosmetic/appearance industry and over 16 years knowledge and expertise with lasers. We have been teaching nurses, aestheticians, electrologists and other laser operators the use of lasers throughout the last ten years. We believe that ongoing support, peer review and the availability of advice from experienced operators is essential for good clinical practice.

## **For medical based aestheticians, certification in Laser Hair Removal is important for the following reasons:**

- The Spa and Medical market may require certification or some experience for employment
- To demonstrate a standard level of knowledge and competency equal to or greater than others in your field
- To also demonstrate that you are interested in maintaining higher standards in the field of Laser Hair Removal as a professional and industry expert
- To effectively limit the liability of employers
- Certification and training is a method to elevate your status and legitimacy amongst your peers and future employers, and to also demonstrate competency with potential and existing government regulatory agencies. Some U.S. states and some insurance companies are requiring courses of 24-50 hours to perform procedures.

**Our 5 Day Laser Fundamentals Course** will provide physicians, nurses, medical assistants, aestheticians, electrologists, other laser system operators or those in related field with a thorough understanding of both theoretical and practical concepts of laser hair removal laser vein removal and photorejuvenation (photofaials).

**Our 4 Day Laser Training Course** will provide physicians, nurses, medical assistants, aestheticians, electrologists, other laser system operators or those in related field with a thorough understanding of both theoretical and practical concepts.

**Our 2 Day Advanced Laser Training Course** will provide physicians, nurses, medical assistants, aestheticians, electrologists, other laser system operators or those in related field with a thorough understanding of both theoretical and practical concepts of laser hair removal. (\*If you only require a **'Laser Refresher'** course and already have certification on Laser or IPL and wish to *upgrade or improve* your skills, then you may take **the 2 Day Advanced Training Course. Proof of certification in laser or IPL is mandatory to take the Advanced Laser Training.**)

#### **ADMISSION REQUIREMENTS:**

The Laser Hair Removal training course offered by **Laser Spa Group** has been developed for licensed Aestheticians, Electrologists, training and/or work experience as a Laser System Operator, or those covered under a cosmetologist license, health professionals, as well as medical professionals including doctors, nurses, medical assistants, and those with a medical background as verified by copies of certificates and diplomas and those in related field or work-related experience.

Laser Hair Removal Services are governed under different licensing laws in almost every State in the U.S. It is the responsibility of each student who is wishing to practice services in their own business to verify that the laws pertaining to laser hair removal services are met. In Canada, no such licensing exists at this time.
